

TOP 8 PLACES TO PROMOTE YOUR SKILLS

In this day and age, knowing how to promote your skills can be as important as having them to begin with. We've put together the Top 8 places where you should have an online presence to truly stand out from the crowd!

LINKEDIN

LinkedIn is the largest professional networking site available today. And the perfect way to connect with other professionals, like minded individuals and future employers. Additionally, it has become a great way for you to share and exchange knowledge, ideas and experiences that could end in something more.

Blogging can be a fantastic way to demonstrate your skills, learn topics in more depth, and build an audience. There are quite a few examples of data science and programming blogs that have helped their authors land jobs or make important connections. Blogging is one of the most important things that any aspiring programmer or data scientist should be doing on a regular basis.

PERSONAL BLOG

KAGGLE

Kaggle is a platform built for predictive modelling and analytics competitions. The whole community competes to solve amazing challenges and produce the best models for predicting and describing data. Build your profile, up your skills and be the star candidate of any company that's looking for proven talent.

GITHUB

The world's leading software development platform: where millions of developers gather to code, share, create, review and work together in fascinating and widespread projects. Github has become the go-to place for many HR departments' to check how involved a developer has been with the community and measure how impactful he can be.

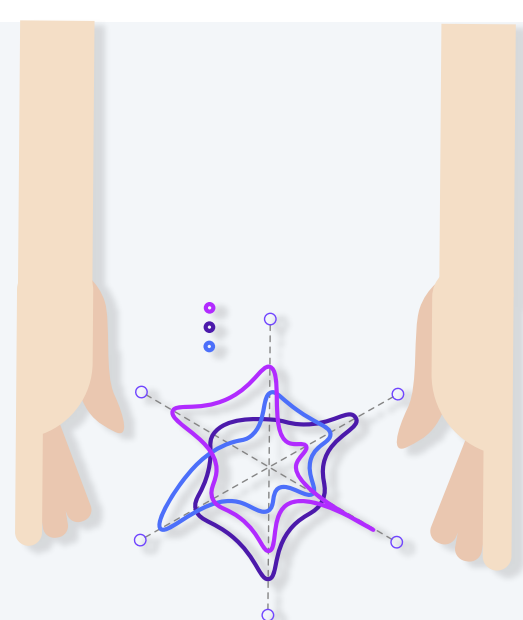

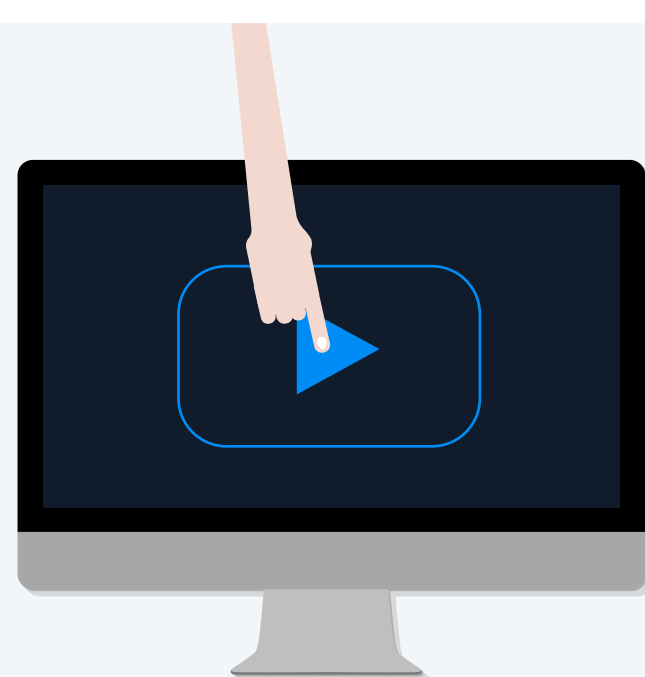

TABLEAU PUBLIC

Tableau Public allows anyone to publish interactive and beautiful data visualizations. These visualizations can be embedded into webpages and blogs, shared on social media and email or made available to download so all users can enjoy!

Quora is a question and answer site where the dynamic is simple: questions are asked, answered, edited and organized by its community. Quora is on a mission to share and grow the world's knowledge and you shouldn't be the exception.

YOUTUBE

Youtube is the most popular video site today. Hundreds of individuals use it in a similar fashion as a personal blog, by sharing interesting projects, connecting with others and even creating educational series on what they have learned in the past.

Cross Validated is a question and answer site for people interested in statistics, machine learning, data analysis, data mining, and data visualization. Definitely a place where you don't want to miss an opportunity to improve what you know with like-minded individuals!
